

LIST OF PLATES

Plate No.	Title	Page No.
3.1	Pictures showing the stepwise plantation procedure of the collected <i>J. curcas</i> accessions	21
4.1	Figures showing harvesting of fruits and seeds and their transverse section with different parts	40
4.2	Figures showing <i>Jatropha curcas</i> oil samples extracted from the different accessions analyzed	42
4.3	Extracted DNA samples of different <i>J. curcas</i> L. accessions analyzed	49
4.4	Polyacrylamide gel electrophoresis showing the TBP amplification profile of 24 accessions.	49
4.5	hTBP banding pattern for the 24 <i>J. curcas</i> accessions.	50
4.6	TBP amplification after genomic DNA digested with enzyme <i>Aat</i> -II	50
4.7	Pattern of RAPD amplification of 24 <i>J. curcas</i> accessions by LBJ6 primer after restricting the DNA samples with <i>Hpa</i> II (upper) and <i>Msp</i> I (lower) enzymes	52
